sky@skyeits.com

Growing demand for energy, and problems of scarcity and environmental impact associated with conventional sources are most important and difficult challenges confronting the world today. As digital technologies make energy systems around the world more connected, intelligent, efficient, reliable, and sustainable, proliferation of data, analytics and connectivity are aiding in contextualizing the digital energy ecosystems.

SkyeITS energy solutions assist you improving the productivity, accessibility, and sustainability of energy systems.

## Energy Efficiency

*Contextualizing your energy systems in a unified environment to improve efficiencies.*

Linking, monitoring, aggregating, and controlling the disparate energy producing units and consuming equipment's on a common environment provides a holistic view of the energy ecosystem facilitating system-wide interventions, rather than silo-based approach of addressing isolated pockets. SkyeITS's solutions help you to improve energy efficiencies by assisting you to gather, process, analyze and disseminate data from multiple systems and contextualizing them for decision support.

## Energy Infrastructure

*Advancing your energy infrastructure to meet the challenges of future.*

Most of the energy infrastructure currently in use was designed for conventional technologies. To address the energy challenges while leveraging the benefits of digital technologies, need of the hour is to modernize the infrastructure aligned with technological advances. SkyeITS assists you in design, planning, deployment, and monitoring of energy infrastructure.

## Energy Analytics

*Improving business decisions with contextualized energy intelligence.*

SkyeITS's analytics solutions help you to collate rapidly increasing data volumes for valuable insights that assist stakeholders to analyze, supervise, and optimize production, distribution and consumption of the energy system. Powered by real-time sensors, our real-time allows health monitoring, asset integrity management, outage management and mobile workforce management to enhance business decisions based on intelligence, without compromising on cost.

## Energy Audits

*Assisting your energy efficiency programs with contextualized data and insights.*

SkyeITS energy audit services provide you with a clear understanding of energy production, distribution and consumption helping you to make improvements in production efficiency and identify cost saving opportunities.

**SkyeITS**  
Your Vision is Our Mission  
[www.skyeits.com](http://www.skyeits.com)

SkyeITS is a spatial solutions company with an endeavor to assist organizations to succeed in their digital transformation journey, in particular by helping them to harness the power of spatial.

Thinking spatially, through a collaborative approach, we partner with organizations to support optimization of their business processes by rapidly deploying technology that leverages best-of-breed at an affordable cost. Through a process centric approach, our delivery excellence model leverages our global experience and expertise for providing technology solutions that yield better outcomes. Working closely with organizations our efforts are targeted at understanding specific business needs and

technologically empowering them to take informed decisions towards reducing costs, improving efficiencies, and enhancing technology ROI.

Founded in 2010, SkyeITS is headquartered in New Jersey USA, with regional offices in Canada, India and Qatar and global research & development (R &D) center in India.

**Our Global Headquarters** Sky E IT Solutions Inc., 5 Independence Way, Suite 300, Princeton, New Jersey – 08540, USA.

**Our Regional Offices :** Ontario, CANADA , Hyderabad, INDIA, Doha, QATAR

**Our R&D Center :** Hyderabad, Warangal, INDIA
