

CAPABILITIES

Geospatial Information Management

Harnessing the context of location to enhance your business value

+1 512-293-4891
sky@skyeits.com

Proliferation of location rich data at a rapid pace is throwing up new challenges to demystify large volumes of geospatial information for unlocking the untapped potential.

SkyeITS offers Geospatial Information Management (GIM) solutions that are focused on providing actionable intelligence for informed decisions. Focused on assisting our customers to harness the geospatial value optimally, our end-to-end offering cut across the entire geospatial value chain.

Our data solutions, software solutions and consulting services are aimed at supporting our customers to overcome their business challenges for a sustainable growth.

Data Solutions

Transforming geospatial data into knowledge for informed decisions.

SkyeITS is adept at transforming geospatial data into knowledge for informed decisions. By automating data acquisition, data processing and data management we assist our customers to geo-enable their enterprises at a rapid pace. From strategic planning to management of business activities, we deliver data solutions across the geospatial value chain. Our range of solutions cover:

- Earth Observation
- Lidar
- Data Processing and Analysis
- Data Engineering and Integration
- Data Curation and Purification

Software Solutions

Empowering you with software solutions that contextualize and demystify your business challenges.

SkyeITS software solutions help our customers to make sense out of the large volumes of location rich data by contextualizing and transforming them into spatial knowledge. By combining geographic data with business data we help you to demystify the interdependencies and interrelationships that guide your decision-making. Our range of solutions cover:

- Enterprise Applications
- Web and Mobile Applications
- Spatial analytics and modelling
- Geo-enabled Big data and IoT
- Geo-Enabled Artificial Intelligence (AI)

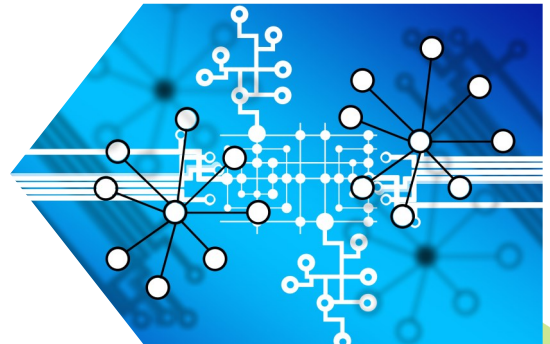

Consulting

Maximizing your human capital by assisting you to do more with less.

SkyeITS HR consulting solutions assist you in augmenting skilled resources for your organization. Our technology consulting and managed services are designed based on international best practices with an intent to assist organizations in embracing appropriate technology solutions and maximize their technology ROI.

Our “Esri practice” assists organizations in fulfilling their resource augmentation needs skills around Esri technology and ArcGIS product family. With a good understanding of the local culture and ethos and their impact in professional working environments, we strive to fulfil the resource augmentation through our offices located in USA, Canada, Middle East and India. Our consulting solutions cover :

- Technology Staffing
- Technology Implementation
- Managed Services
