Government Solutions

Assisting governments in achieving sustainable economic growth.

Need for contextualizing the economic activities to understand the interconnections and interdependencies is need of the hour for a sustainable economic growth. By harnessing the power of spatial, governments can discover insights from within data and transform how they see, think and act. While avoiding the “data traps”, spatial approach helps governments with operational improvements, cost savings, improved stakeholder collaboration and better understanding of the evolving situations.

SkyeITS provides data and software solutions to governments for enhanced situational awareness and actionable intelligence for informed decisions.

Geo-Enabled Decision Support Systems

Demystifying and contextualizing data volumes for improved and inclusive governance.

In a connected world, geospatial technologies are shepherding a new era of contextualized environments by bringing together multiple disciplines on an unified environment, for better understanding of the situation. Integrated geo-enabled environments are providing tools for analysis, data assimilation, visualization, modeling, and collaboration that help governments to have complete picture at their disposal before they reach a decision.

SkyeITS data and software solutions help you with design, development and management of unified geo enabled environments, bringing together disparate data and systems for decision support. Our cloud, web and mobile solutions help demystify the ever increasing volumes of location rich data, enabling governments to make inclusive decisions while embracing complexity and fostering a participative approach.

Geo-Data Content Solutions

Unlocking the potential of spatial intelligence for decision support.

Governments rely on authoritative geospatial content for decision making and policy formulation. Need for acquiring, processing, and bringing together diverse types of spatial and non-spatial data and their integration is rapidly increasing.

SkyeITS data and software solutions provide timely, accurate, and cost-effective geospatial data and derivatives to governments to discover insights from within data and see, think and act in a coordinated manner.

Geo-Data Quality Solutions

Ensuring “fitness to purpose” of data and processes for timely and accurate decisions.

Governments need high-quality geo-data that is accurate and reliable for making critical decisions. Lineage, positional accuracy, attribute accuracy, logical consistency and completeness are important dimensions that ensure geodata’s “fitness to the purpose”.

With geo-data sourced from diverse sources pose numerous challenges for unification and accurate decision making. With different types of data used for different applications, need for ensuing quality compliance of data that meets the stated purpose is becoming increasingly important.

SkyeITS quality assurance solutions assist governments in carrying out quality assurance and quality control of the geo-data and ensure their fitness to purpose for optimal results.

SkyeITS

Your Vision is Our Mission
www.skyeits.com

SkyeITS is a spatial solutions company with an endeavor to assist organizations to succeed in their digital transformation journey, in particular by helping them to harness the power of spatial.

Thinking spatially, through a collaborative approach, we partner with organizations to support optimization of their business processes by rapidly deploying technology that leverages best-of-breed at an affordable cost. Through a process centric approach, our delivery excellence model leverages our global experience and expertise for providing technology solutions that yield better outcomes. Working closely with organizations our efforts are targeted at understanding specific business needs and

technologically empowering them to take informed decisions towards reducing costs, improving efficiencies, and enhancing technology ROI.

Founded in 2010, SkyeITS is headquartered in New Jersey USA, with regional offices in Canada, India and Qatar and global research & development (R &D) center in India.

Our Global Headquarters Sky E IT Solutions Inc., 5 Independence Way, Suite 300, Princeton, New Jersey – 08540, USA.

Our Regional Offices : Ontario, CANADA , Hyderabad, INDIA, Doha, QATAR

Our R&D Center : Hyderabad, Warangal, INDIA
